

Customization Overview

Powering the Co-Creation Generation

Add product customization to your experience using the [Customization Experience Platform \(CXP\)](#).

Integration Overview

[CXP](#) is set of APIs and Components that collectively unlock your consumers' ability to [design](#) and [buy](#) customized products.

Use Cases

Here are some use cases for integrating CXP capabilities into your experience.

Show Customizable Products	Which products are customizable? How do I start designing?
Show a Design Experience	What customization options are available? What does my design look like? How much will it cost?
Enable My Designs	How do I save a design in My Designs?

[Enable Purchasing](#)

Is the product available for purchase? How do I select a size? When would my design be delivered to me?

TIP: See [Adding Customization to Your Experience](#) for full integration details.

User Journey

What We Provide

BROWSE	Supported ✓	- Factory capacity & delivery messaging - Available sizes - Product imagery
	Not Supported ✗	- Base product data & copy - Non-Builder-based imagery
DESIGN	Supported ✓	- Flexible design options - Full rendering of consumer's changes - Local storage of consumer's designs
	Not Supported ✗	- Products/Builders created with other tools/systems - Products that don't leverage Customization data model standards
BUY	Supported ✓	- Available sizes - Ability to save or share a validated design - A reference ID that can be passed to Cart/Checkout experiences
	Not Supported ✗	Order Capture & Payment functionality
PRODUCE	Supported ✓	Bill of Materials per design ID.
	Not Supported ✗	- No Factory routing - No production solution.
