

Customization Overview

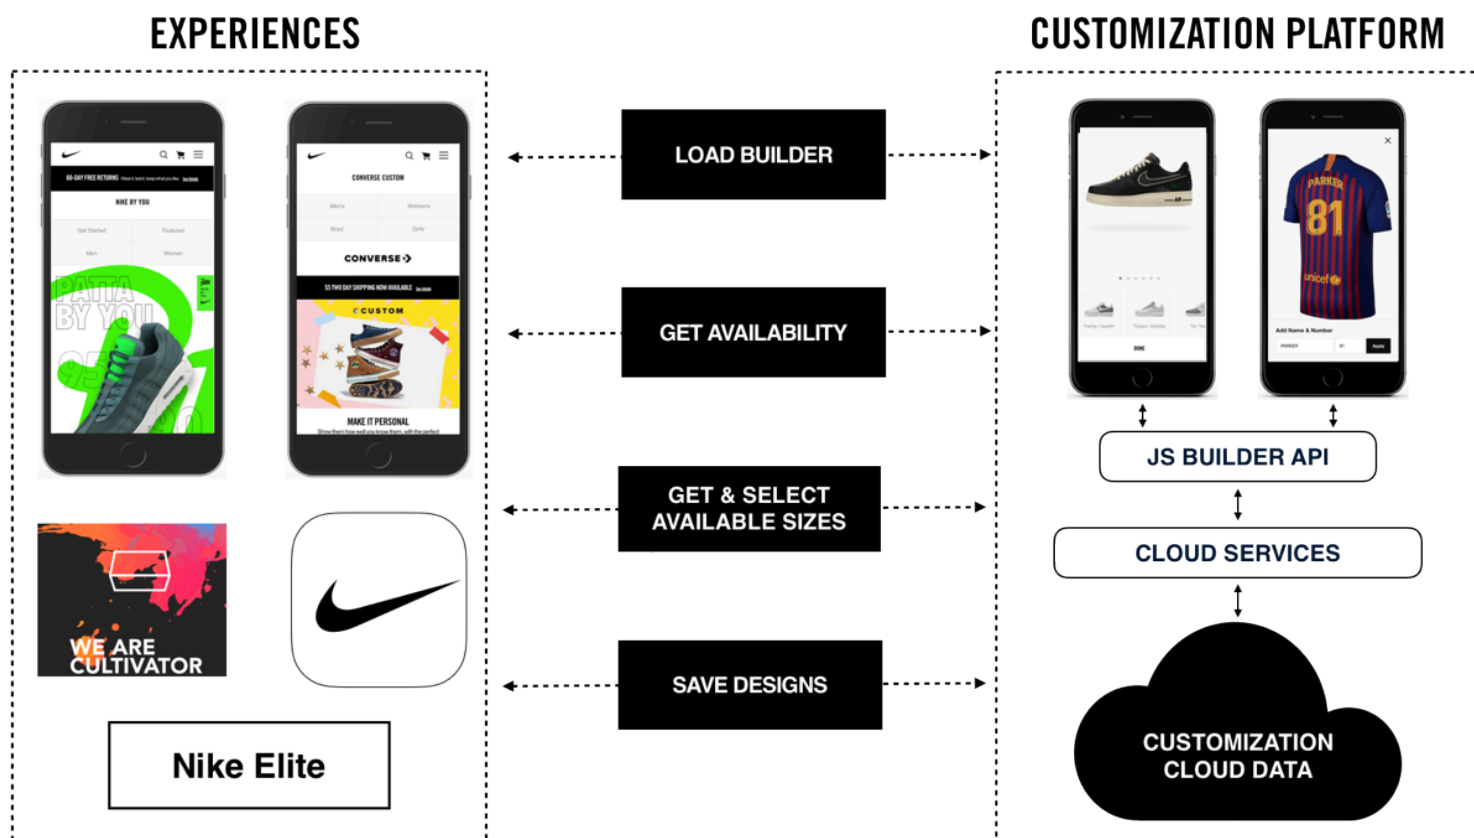

Powering the Co-Creation Generation

Add product customization to your experience using the Customization Experience Platform (CXP) (<https://nde-devportal-docs.niketech.com/doc/commerce/customization/use-customization.html>).

Integration Overview

CXP (<https://nde-devportal-docs.niketech.com/doc/commerce/customization/use-customization.html>) is set of APIs and Components that collectively unlock your consumers' ability to design (<https://nde-devportal-docs.niketech.com/doc/commerce/customization/use-customization.html#show-a-design-experience>) and buy (<https://nde-devportal-docs.niketech.com/doc/commerce/customization/use-customization.html#enable-purchasing>) customized products.

Use Cases

Here are some use cases for integrating CXP capabilities into your experience.

✓ Show Customizable Products (<https://nde-devportal-docs.niketechnology.com/doc/commerce/customization/use-customization.html#show-customizable-products>)

Which products are customizable? How do I start designing?

✓ Show a Design Experience (<https://nde-devportal-docs.niketechnology.com/doc/commerce/customization/use-customization.html#show-a-design-experience>)

What customization options are available? What does my design look like? How much will it cost?

✓ Enable My Designs (<https://nde-devportal-docs.niketechnology.com/doc/commerce/customization/use-customization.html#enable-my-designs>)

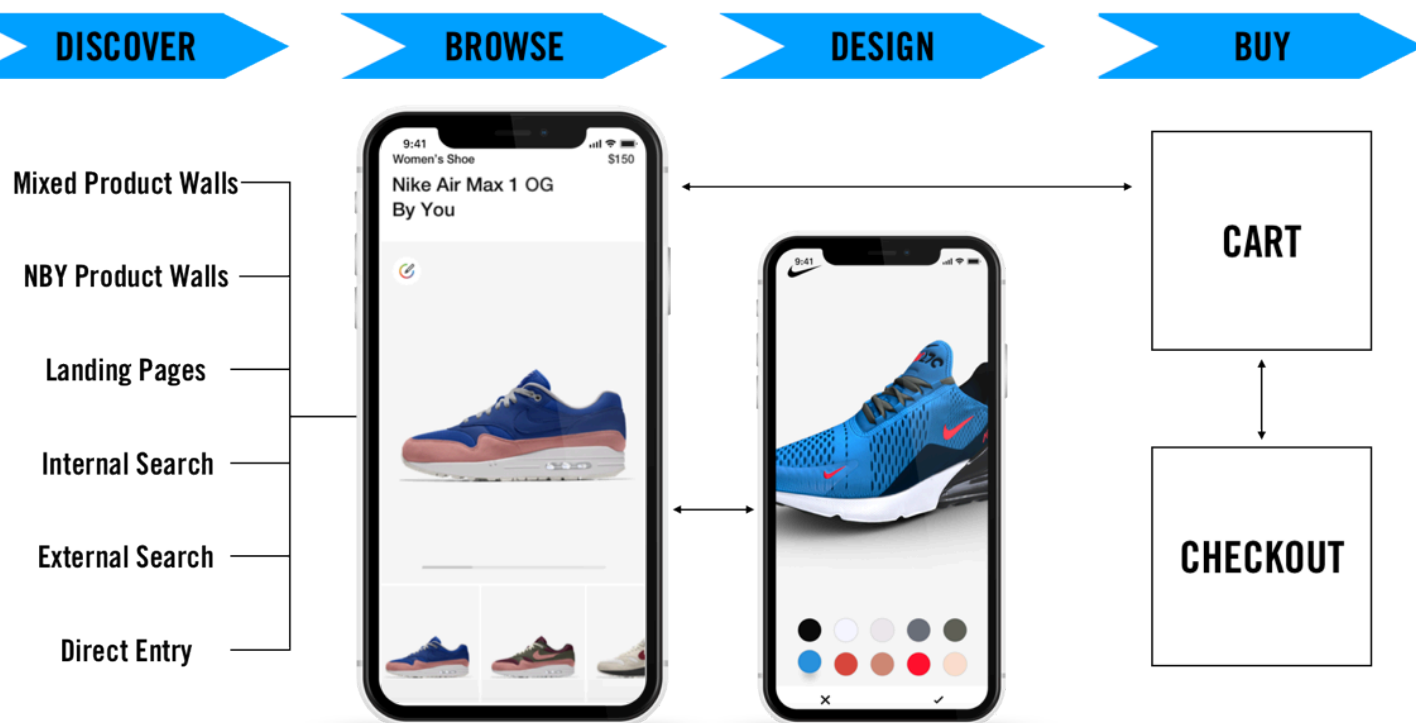

How do I save a design in My Designs?

✓ Enable Purchasing (<https://nde-devportal-docs.niketechnology.com/doc/commerce/customization/use-customization.html#enable-purchasing>)

Is the product available for purchase? How do I select a size? When would my design be delivered to me?

TIP: See Adding Customization to Your Experience (<https://nde-devportal-docs.niketechnology.com/doc/commerce/customization/use-customization.html>) for full integration details.

User Journey

What We Provide

BROWSE	Supported 	- Factory capacity & delivery messaging - Available sizes - Product imagery
	Not Supported 	- Base product data & copy - Non-Builder-based imagery
DESIGN	Supported 	- Flexible design options - Full rendering of consumer's changes - Local storage of consumer's designs
	Not Supported 	- Products/Builders created with other tools/systems - Products that don't leverage Customization data model standards
BUY	Supported 	- Available sizes - Ability to save or share a validated design - A reference ID that can be passed to Cart/Checkout experiences
	Not Supported 	Order Capture & Payment functionality
PRODUCE	Supported 	Bill of Materials per design ID.
	Not Supported 	- No Factory routing - No production solution.
