

ADMIN CLIENT LIBRARY OVERVIEW

The Nike Admin Component Library (NACL) is a modular and flexible toolkit of user interface components that you can use in your internal Nike applications.

Plug in the pieces you need and quickly build your UI

- Powerful functionality
- Easy installation
- No configuration required
- Customized styles with only one line of code
- Supports a consistent look and feel across Nike applications
- Backed by React JavaScript framework
- Built-in state maintenance. No Redux store required.

Get Started

- **Story Book:** (<https://pages.github.nike.com/UXFoundation/premium-experience-toolkit/?selectedKind=Admin%7CAppBar&selectedStory=Decorated&full=0&addons=1&stories=1&panelRight=0&addonPanel=storybook%2Fstorybook-addon-knobs>) Check out live demos with source code for every component.
- **Admin Component Guide:** (<https://bitbucket.nike.com/projects/RUX/repos/premium-experience-toolkit/browse/docs/AdminComponents.md?at=master>) Get installation information, code snippets and more.
- **Contributing to the NACL:** (<https://bitbucket.nike.com/projects/RUX/repos/premium-experience-toolkit/browse/docs/AdminContributing.md>) Learn how to add your new component to the library.
